EDUCATION

Master of Computer Applications
KR Mangalam University
2023 - 2025

Bachelor of Computer Applications
Jagannath University
2019 - 2022

12th
Resonance Public School
2018 - 2019

TECHNICAL SKILLS

- Java
- Python
- SQL
- HTML,CSS,JS
- PHP
- React JS
- C/C++

LANGUAGE

- English
- Hindi

CAREER OBJECTIVE

Versatile software developer with skills in Java, data structures, algorithms, and frontend technologies. Looking to leverage my comprehensive skill set in a Java Developer role where I can contribute to both backend efficiency and frontend functionality

WORK EXPERIENCE

DigiLink Ads   2022 – 2023
FullStack Developer

- Working with the wider development team.
- Manage website design, content, and backend support

PROJECTS

Asian Packers And Movers   NOv,2020 – Dec,2020
Language: Java, Java (AWT), Sql

Developed a logistics management platform with dual interfaces for User and Broker, enabling users to register their moving companies and facilitate bookings based on user-defined preferences, including distance and service type. Implemented in Java with AWT for the graphical user interface and SQL for database management.

Railway Management System   Feb,2021 – March,2021
Language: Java, Java (AWT), Sql

Developed a comprehensive Railway Management System with separate interfaces for User and Admin, allowing users to book tickets based on journey preferences and enabling admins to manage train schedules and routes. Built using Java with AWT for the user interface and SQL for backend database management

Library Management System   Feb,2021 – March,2021
Language: C++, Data File

Developed a Library Management System in C++ with persistent data storage using a data file, supporting two interfaces: Student and Admin. The Student interface allows users to issue books for a period of 15 days, with automatic fine calculation for overdue returns. The Admin interface enables CRUD (Create, Read, Update, Delete) operations for managing book and student records, including adding, updating, and deleting entries.
